

Only 4 Easy Steps...

Step #1:

Crabgrass Preventer plus Lawn Food

- Pre-emergent control of crabgrass
- Provides quicker spring green up
- Extended greening from controlled release nitrogen
- For use on all turf grasses

Step #2:

Weed and Feed

- Fertilizes for quick, deep greening
- Post-emergent control of over 140 broadleaf and viny-type weeds; kills dandelion, plantains, and many more
- Extended greening from controlled release nitrogen

Step #3:

Summer Lawn Food

- Fertilizes for quick, deep greening
- Extended greening from controlled release nitrogen
- For use on all turf grasses

Step #4:

Winterizer & New Lawn Starter

- Contains Iron & Sulfur
- Stimulates root growth
- Helps promote winter hardiness

can achieve a beautiful lawn
in only 4 easy steps!

Canfield, Ohio

Be the Envy of the Neighborhood...

Scotts Products use the latest technology along with high-quality materials to help turn your lawn into the “American Dream”.

Let us help you become the envy of your neighborhood.

That's the

way.

Suggested Application Dates

(By holidays)

Easter - Step #1

Crabgrass Preventer plus Lawn Food

- Apply to lawn BEFORE the ground temperature reaches 55°F. It will not kill crabgrass that is already up! DO NOT apply to newly planted seed (must have 2 cuttings on NEW grass.) It is best if lawn is rained on after applied.

Memorial Day - Step #2

Weed and Feed

- Please don't mow grass before applying! Apply in the early morning or late evening when there is dew on the ground. No rain for 2-3 days.

4th of July - Step #3

Summer Lawn Food

- Best results will occur if lawn is rained on after application. If the temperature is over 85°F, lawn MUST be rained on or watered within the first 24 hours after application.

Labor Day - Step #4

Winterizer & New Lawn Starter

- Optimum results if lawn is rained on after application. OK to apply until Thanksgiving.
